**Apoptosis Definition.** Apoptosis is a process that occurs in multicellular when a cell intentionally "decides" to die. This often occurs for the greater good of the whole organism, such as when the cell's DNA has become damaged and it may become cancerous.. Apoptosis is referred to as "programmed" cell death because it happens due to biochemical instructions in the cell's DNA; this ...

Ghosh et al. provide evidence that  $\beta$ -coronaviruses do not use the biosynthetic secretory pathway typically used by enveloped viruses to leave infected cells. Instead, these viruses traffic to lysosomes for unconventional egress by Arl8b-dependent lysosomal exocytosis. Their non-lytic release results in lysosome deacidification, inactivation of lysosomal degradation enzymes, and disruption of ...
